***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP06107456 in view of Rosenflanz (U.S. Patent No. 6,454,822).

JP06107456 disclosed a method comprising calcining a powder mixture of  $\text{Al}_2\text{O}_3$  and  $\text{Y}_2\text{O}_3$ , pulverizing the calcined mixed powder, molding the pulverized mixed powder and heating the molded product in nitrogen atmosphere to form Y-Al-garnet sintered body.

The difference between the claim and the reference is that the reference does not teach introducing aluminum nitride to the yttrium-aluminum garnet and heating.

Rosenflanz teaches making aluminum oxycarbide/nitride-  $\text{Al}_2\text{O}_3$ -  $\text{Y}_2\text{O}_3$  abrasive articles where a source of nitrogen such as AlN can be used with  $\text{Al}_2\text{O}_3$  source and  $\text{Y}_2\text{O}_3$  source to form the articles (col. 3, line 66 to col. 4, line 2.)

Since Rosenflanz teaches AlN is conventionally known in the same field of endeavor as a nitrogen source it would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute nitrogen atmosphere in the sintering step of the JP6107456 with the AlN and introducing it in the pulverized mixed powder as the nitrogen source for making the sintered body as taught by JP6107456.

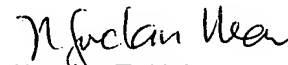

3. Claims 3-10, 17-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
